Solutions, inspired by ice

For over 75 years Follett® has been creating innovative ice solutions to promote health, safety, and well-being. From gravity dispense ice storage bins and transport systems, to scale-inhibiting Horizon Elite ice machines with consumer-preferred Chewblet ice and remote ice delivery (RIDE technology), to the widest offering of ice and water dispensers in the industry, Follett can keep your ice cleaner, save your staff hours of extra work and delight your customers, all while providing lower life cycle costs.

Choose The right ice

People love Chewblet ice! In fact, it's preferred 2:1 over cube ice because it's an easy to chew, fun kind of ice.

Join in on the profits

- 30% will buy more fountain drinks when they have Chewblet ice
- increases sales of high margin fountain drinks
 - lowers syrup costs due to superior drink displacement

Exceptional performance

- Chewblet ice matches the performance of cubes
- melts at a similar rate
 - produces same cold plate performance
 - dispenses reliably

The right ice

- preferred 2:1 over cube ice
- easy to chew, fun kind of ice

"I've been going to (my local drive-thru restaurant) on my lunch hour almost every day for the past year just to get Chewblet ice"

"I fell in love with Chewblet ice! It's chewable, tastes great and makes my drink fun"

"My family loves the ice so much that I bring home a bag and keep it in the freezer"

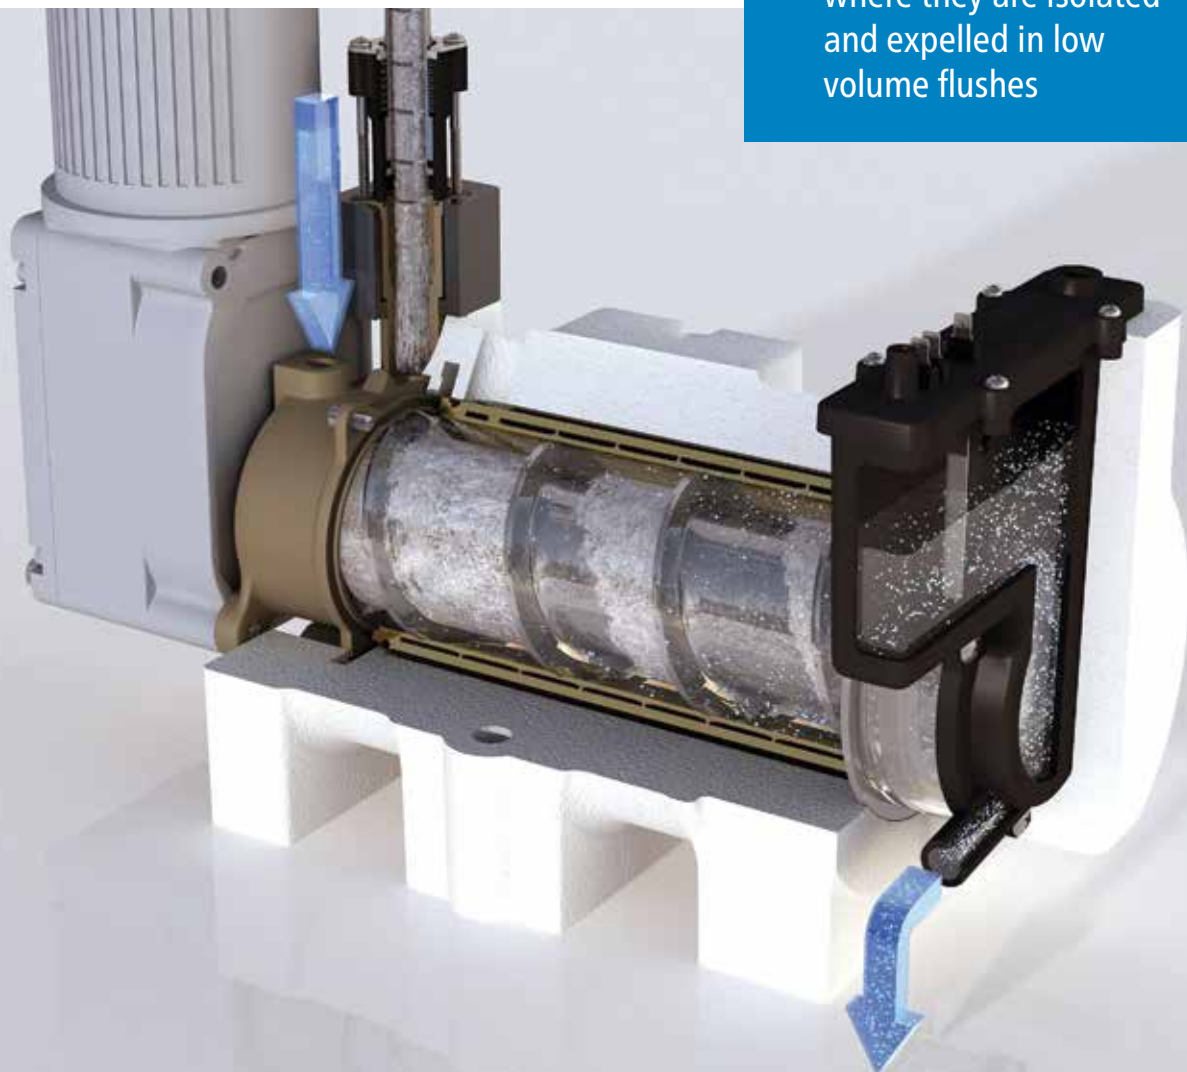

High capacity Horizon Elite ice machines

Revolutionary design

The challenge: Water with high levels of dissolved minerals, also called total dissolved solids (TDS), cause scale buildup, clogged drain lines and soft ice that can jam dispensers

The solution: With Horizon Elite, fresh inlet water forces dissolved solids to the reservoir where they are isolated and expelled in low volume flushes

Horizon Elite utilizes significant advancements in technology to reduce operating costs over the life of the ice machine

Minimize need for water treatment

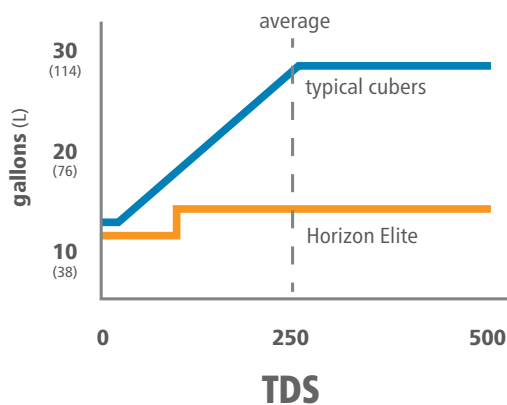

Reduce frequency of descaling

Dispense ice more reliably

Horizon Elite

- largely eliminates the need to descale the ice machine between normal sanitizing intervals
- dramatically reduces the need for reverse osmosis or other expensive scale control in most scale-prone waters
- produces purer ice to provide trouble-free dispensing
- promotes longer equipment life with less wear on the gearmotor
- uses 35% to 50% less water than cube ice machines
- eliminates the need to inspect or replace bearings

Water used per 100 lb (45 kg) of ice

“We were amazed that there was no scale on the evaporators or augers after over a year of operation in high TDS water”

Out-of-the-way RIDE ice machines

RIDE (remote ice delivery equipment) automatically delivers ice through a tube

- provides full access to clean dispenser ice storage area
- removes heat and noise in fountain area
- creates upscale look with ice machine out of view, up to 75 feet away
- opens up more space for merchandising
- facilitates easier access for maintenance; no interruption to customers

	Series	Capacity per day	Condensing	Compatible with Ice Manager	Maximum RIDE distance
Maestro Plus	400	Up to 425 lbs	Self-contained air-cooled	N	20 ft
	700	Up to 759 lbs	Self-contained air-cooled	Y	75 ft
Horizon Elite	1000	Up to 978 lbs	Self-contained air-cooled; Remote air-cooled	Y	75 ft
	1400	Up to 1371 lbs	Self-contained air- and water-cooled; Remote air-cooled	Y	75 ft
	1800	Up to 1784 lbs	Remote air-cooled	Y	75 ft
	2100	Up to 2039 lbs	Remote air-cooled	Y	75 ft

Ice distribution with Ice Manager

The Ice Manager diverter valve system sends ice to two dispense points from only one ice machine

- ice delivery based on demand delivers ice when you want it, where you want it
- fewer ice machines to purchase and maintain
- more efficient use of your production capacity

Compact Maestro Plus ice machines

Maestro Plus integrated ice machine bin is only 24" wide and fits under standard 34" counters. Available with legs for freestanding applications.

Maestro Plus ice machines deliver up to 425 lbs of Chewblet ice in less space

- Chewblet ice is customer-preferred
- top mount 414 series automatically fills bins or ice and beverage dispensers
- 414 series with RIDE automatically delivers ice up to 20 ft away
- self-flushing and semi-automatic cleaning for longer life and less maintenance

Series	Capacity per day	Condensing	Compatible with Ice Manager	Available ice types
Maestro Plus	Up to 425 lbs	Self-contained air-cooled	N	Chewblet, flake

Ice storage Upright bins

Fresher, cleaner ice is always at hand with first-in-first-out ice turnover and the patented SmartGATE® ice shield

- hands, clothes and hair stay out of ice storage area
- SmartGATE controls the flow of ice for fewer spills and faster operation
- elevated bin allows ergonomic access to ice
- upright bins require less floor space than comparable slope front bins

Doors	Models available	Widths	Capacities
Single	14 models	30 - 60"	450 - 2000 lbs
Double	7 models	72 - 96"	1800 - 4600 lbs

Ice storage and transport

Ice•Devlce

Sanitary gravity dispensing eliminates scooping for cleaner, safer ice. Ice•Devlce dispenses ice 7 times faster than scooping.

- dispenses ice through a chute directly into SmartCART™ 75 for fast and easy delivery of ice
- reduces risk of contamination from human contact
- cleaner, fresher ice with first-in-first-out ice turnover
- less risk of slips and falls with reduced ice spills
- fewer strains and sprains by eliminating scooping and carrying ice

Doors	Models available	Widths	Capacities
Single	12 models	30 - 60"	450 - 1600 lbs
Double	6 models	72"	2100 - 4600 lbs

Ice storage and transport

ITS

Sanitary gravity dispensing eliminates scooping for cleaner, safer ice. ITS dispenses ice 15 times faster than scooping.

- dispenses ice through a bottom-mounted gate into a SmartCART 240 for high volume sites
- first-in-first-out ice turnover for cleaner, fresher ice every time
- reduces labor with fast ice delivery
- decreases human contact for more sanitary ice delivery
- improves worker and guest safety with less effort and fewer spills

Bays	Models available	Widths	Capacities
Single	2 models	31"	300 - 600 lbs
Double	2 models	60"	1300 - 2100 lbs
Triple	2 models	90"	1700 - 3200 lbs

DB650

Semi-automatic ice bagger **Ice Pro**

Increase profits by bagging your own ice at a fraction of the cost of prepackaged ice. Half your profits are lost when you purchase ice.

- fill 6 to 8 bags of ice per minute
- increases profit on selling packaged ice
- fits a wide variety of bags and can be used to fill containers or ice coolers
- bag and transport for convenient distribution in stadiums and catering
- compatible with cube ice up to 1 inch square and Chewblet ice

Model	
DB650SA	650 lb ice storage
DB1000SA	1000 lb ice storage

Models exclusively with ice and water

Low-profile dispensers **Vision Series**

Upgrade your aesthetics while providing more sanitary ice for your customers

- create an upscale fountain station
- low profile design with minimal counter footprint
- compatible with RIDE ice machines
- single-sided models with up to 8 valves
- ice-only or ice and water configurations available
- perfect for island applications

Model	
VU155	Up to 150 lb ice storage – 8 valves
VU155N	Up to 150 lb ice storage – ice and water
VU300	Up to 300 lb ice storage – 8 valves

Ice and water Champion Series

Up to 125 lb ice production per day of consumer-preferred Chewblet ice

Champion 7
ice and water dispenser

Champion 15
ice and water dispenser

- drainless operation for easier, less expensive installation
- compact designs, including models to fit under wall-mounted cabinets
- touchless dispensing, a key part of SHIELD suite of sanitation enhancements
- 115 V models available with hot water

Model	
Champion 7	7 lb ice storage – ice and water, ice and water and hot water, or ice-only
Champion 15	15 lb ice storage – ice and water, ice and water and hot water, or ice-only

Ice and water

Symphony Plus

Up to 425 lb ice production per day and models with up to 90 lb storage capacity

- sanitary lever or SensorSAFE™ infrared dispensing options
- space-saving designs offer the most compact footprints in the industry
- popular choice for cafeterias, break rooms, and iced coffee programs
- uses 20% less energy and 40% less water to produce ice than similar-sized cube ice machines

Model	
12 Series	Integral ice machine and 12 lb ice storage
25 Series	Modular ice machine and 25 lb ice storage
50 Series	Modular ice machine and 50 lb ice storage
110 Series	Modular ice machine and 90 lb ice storage

Carbon and carbonless Water filter systems

Water filtration systems for ice and water dispensers and ice machines to address a variety of requirements

- three systems to choose from
- multi-level filtration provides cleaner ice and water
- reduces common water-related ice machine issues for improved performance
- reduces downtime and maintenance costs

Model	
CARBONSTDCAPSYSTEM	Standard capacity carbon (5,000 gal)
CARBONHICAPSYSTEM	High capacity carbon (17,500 gal)
CARBONLESSHICAPSYS	High capacity carbonless (capacity based on water conditions)
