

GET STARTED WITH OPEN KITCHEN

Bundle Open Kitchen with compatible equipment. We handle setup, 24/7 support, and ongoing optimization.

Connect Equipment

Plug in the included ConnectWare module to enable built-in connectivity.

Activate Open Kitchen

Create an account—data starts streaming instantly with no additional setup.

Get Actionable Insights

View performance, energy, and usage dashboards. Customize alerts for what matters most

INSIGHTS THAT WORK FOR EVERY TEAM

Culinary Teams

- Instantly create, edit, import/export, and distribute recipes with Menu Builder.
- Monitor fryer oil life, quality and costs with OilSmart.
- Automate temperature monitoring for food safety.

Operations Teams

- Monitor real-time equipment status to prevent disruptions.
- Get alerts and diagnose issues remotely.
- Track usage trends to improve efficiency.
- Customize dashboards for faster decisions.

Facilities Teams

- Reduce truck rolls and downtime via remote diagnostics.
- Benchmark performance to spot inefficiencies early.
- Use connected data for preventive maintenance and extend equipment life.
- Prioritize repairs and replacements with data-driven insights.

Open Kitchen runs quietly in the background—collecting data and surfacing what matters most. No management or maintenance required.
