MODEL ISI-301TH SOFT SERVE FREEZER

FEATURES

Flavor You Can Count On:

Single Flavor, Gravity Fed, Hopper Agitator, Heat Treatment.

Extended-Run Flavor Capability:

Offer all the popular soft serve variations, from low-fat to non-fat options or yogurt, in a model built to support longer operating cycles.

Automated Heat Treatment System:

Daily heating and cooling cycles safely maintain dairy products for up to 28 days before full disassembly and cleaning is required, supporting longer run times and reduced maintenance frequency.

Consistent Production Performance:

One 3.4-quart (3.2 liter) freezing cylinder supports smooth texture and steady output.

Refrigerated Mix Protection:

One 18.5-quart (17.5 liter) hopper with separate hopper refrigeration (SHR) maintains mix below 41°F (5°C) in Auto and Standby modes to protect product integrity.

Operational Awareness:

Mix Low and Mix Out indicator lights alert operators when product needs replenishing. An optional audible alarm adds visibility during busy periods, and automatic shutdown protects the unit if mix is depleted.

Precision Monitoring and Control:

Integrated microprocessor touch controls display hopper and freezing cylinder temperatures at any point during operation while maintaining smooth, consistent soft serve texture for up to two hours without dispensing.

Energy-Conscious Standby Mode:

During extended no-use periods, Standby maintains safe product temperatures in both the mix hopper and freezing cylinder, preserving quality while reducing unnecessary operation.

Flavor Burst Compatible:

Expand product offerings with Flavor Burst systems purchased separately

SPECIFICATIONS

Weights	lbs.	kgs.
Net	309	140
Crated	383	174
