

INNOVATIVE SOLUTIONS FOR

Restaurants

Open Kitchen empowers multi-unit restaurant brands with enterprise-level IoT tools to optimize food preparation, refrigeration systems, and HVAC performance—streamlining operations and reducing costs.

- ✓ Reduce repair and maintenance costs with predictive analytics and alerts
- ✓ Diagnose repair issues quickly with real-time notifications to key employees
- ✓ Reduce downtime and accelerate repairs with prescriptive diagnostics data

Connected Equipment

Manage your entire operation, connecting equipment from all manufacturers, in one centralized location.

Menu Management

Ensure consistency by sharing recipes across locations with remote menu & recipe management—no thumb drives required.

Food Safety

Protect your product from costly spoilage with automated refrigeration and equipment monitoring across every location.

Energy Management

With centralized HVAC, lighting, and equipment control, you can balance comfort and energy usage.
