

ELECTRIC COUNTER TILTING SKILLET

BECT-12

OPERATION SHALL BE BY:

Electric heating elements equipped for operation on:

Electric heating elements equipped for operation on:

- 208 VAC, 1 or 3 Phase, 50/60 Hz
- 220 VAC, 1 or 3 Phase, 50/60 Hz
- 240 VAC, 1 or 3 Phase, 50/60 Hz
- 415/240 VAC, 3 Phase, 4 wire, 50/60 Hz
- 380/220 VAC, 3 Phase, 4 wire, 50/60 Hz

STANDARD CONSTRUCTION SPECIFICATIONS

Shall be a Southbend Steam model BECT-12 electrically heated counter tilting skillet, c-CSA-us and NSF certified.

The skillet shall have a one-piece covered corner, 10 gauge 304 stainless steel pan with satin finish exterior and polished interior with etched gallon markings.

Heating shall be accomplished by electric elements cast embedded into a full 1-1/2" (38mm) thick aluminum casting clamped to the underside of the pan for even heat distribution across the entire surface.

The skillet pan shall be mounted on side pivots to allow tilting for complete removal of contents by means of a tilting handle with a heat proof knob.

A tilt position device shall permit the pan to be tilted forward slightly during cooking to aid in grease removal.

A tilt interlock shall prevent inadvertent tilting of the pan.

The mounting base shall include concealed mounting lugs for bolting unit to a counter top or optional stand.

The controls shall be integrally mounted in the stainless steel clad housing and shall include a power switch, thermostat, pilot light and high temperature cut-off.

The skillet shall operate in a temperature range of 160°F to 445°F (71°C to 230°C).

Approval Notes: _____

SERVICE CONNECTIONS

– ELECTRICAL CONNECTION: Specify 208, 220 or 240 volt, single or three phase, 60 Hz single phase with grounding wire.
