JET 6 BATCH BREWER

JET 6 2.8kW 1000851US

JET 6 5.6kW 1000850US

**VENTILATION REQUIREMENTS**

- > Back: 70mm/2.7"
- > Sides: 50mm/1.9"

Clearance required around machine if installed in an enclosed cabinet.

ELECTRICAL INSTALLATION PROCEDURE**1000850US - 5.6kW/200-230V ac**

When installing the machine, always observe the local regulations and standards. The appliance is supplied with a NEMA L6-30P power cord. A suitable mains power supply socket should be available within easy access of the appliance so that it can be disconnected easily after install.

1000851US - 2.8kW/200-230V ac

When installing the machine, always observe the local regulations and standards. The appliance is supplied with a NEMA L6-20P power cord. A suitable mains power supply socket should be available within easy access of the appliance so that it can be disconnected easily after install.

PLUMBING INSTALLATION PROCEDURE

- > Ensure that the equipment is installed according to local plumbing & water regulations.
- > Mains water pressure required (limits): 8 -145psi (55 -1000kPa, 0.05 - 1MPa).
- > Requires inline water filter within your water specifications.
- > The machine requires either a 3/8" compression, or 3/8" John Guest water connection.
- > Turn on the water to flush any impurities, dust etc from the inlet hose and water pipe. Allow several litres through. Especially for new installations.
- > Connect the hose to the inlet valve of the boiler. Make sure a sealing washer is fitted.
- > Turn on water and check for leaks.
- > The SP9 Head has a drip tray attached with a drain outlet which should be plumbed to waste.
